NOTICE OF RESTRUCTURING AND MOVE OF PATENT EXAMINING CORPS

The Patent Examining Corps is being restructured and moved to meet the needs of the public, changing technology and workload requirements.

The restructuring and move include three major aspects. The first major aspect involves hiring a large number of new examiners and a rebalancing of the Examining Corps to more accurately reflect anticipated workloads and better associate related arts. To this end, the five existing chemical groups will be rearranged into four chemical groups, i.e., Groups 110, 120, 130, and 150. In addition, a new electrical Group 260 will be assembled from components drawn from the other electrical groups.

The second aspect of current efforts involves the creation of twelve (12) additional art units to provide appropriate supervision for the enlarged Examining Corps. These new art units have been distributed throughout the Groups as dictated by anticipated supervisory workloads.

The third aspect involves the physical relocation of many persons and search files as Examining Group 150 moves into additional space on two floors in Building 2 in Crystal Plaza.

It is expected that the relocation and other changes will begin about March 19, 1984, and end by May 1, 1984. The Groups will then be located as shown in the table at the end of this notice.

The efforts described above will result in many examiners being moved to new rooms and some reassigned to different groups and art units. Many pending applications will be assigned to new groups and art units. The Office will do everything practical to minimize the adverse impact of all this change. However, problems and a certain amount of confusion will undoubtedly occur. To help the public cope with these changes, the following guidance is offered:

1. Examining Corps personnel can be reached on the telephone by calling their last known number (e.g., the number shown on the last Office action). The answering receptionist will be provided with a directory of phone numbers which will be updated daily. The caller will be informed of or transferred, if possible, to the new number.

2. Persons who are not successful in reaching an Office employee by telephone should call our information number (703)557-3080 for the latest telephone number of the employee.

3. To determine the current Group or art unit assignment or other pertinent information concerning a patent application (for those entitled to such information) call any telephone associated with the Group to which the application was assigned. The answering receptionist - once assured of the caller's identity and/or entitlement - will provide the current art unit assignment or the other pertinent information concerning the application as shown on the PALM system.

4. Once the new art unit assignment of an application is known, all correspondence involving that application should identify the new art unit. However, all correspondence addressed to the art unit shown on the most recent communication from the Office will be routed to the correct destination.

5. A current directory will be posted periodically in or near the Public Search Room.

6. After the relocations and other changes are completed, new Group and art unit telephone and room numbers will be published in the Official Gazette.

7. Persons delivering papers, arriving for interviews or visiting the Examining Corps after March 19, 1984, should consult the directory posted near the Public Search Room for the current location of the organization and person they are visiting.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries, receive current issues of U.S. Patents and maintain collections of earlier issued patents. The scope of these collections varies from library to library, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections are open to public use and each of the Patent Depository Libraries, in addition, offers the publications of the U.S. Patent Classification System (e.g. The Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions, etc.) and provides technical staff assistance in their use to aid the public in gaining effective access to information contained in patents. With one exception, as noted in the table following, the collections are organized in patent number sequence.

Facilities for making paper copies from either microfilm in reader-printers or from the bound volumes in paper-to-paper copies are generally provided for a fee.

Owing to variations in the scope of patent collections among the Patent Depository Libraries and in their hours of service to the public, anyone contemplating use of the patents at a particular library is advised to contact that library, in advance, about its collection and hours, so as to avert possible inconvenience.
